TOTAL WEIGHT	5,715	5,474	10,532	10,569

* Delivery Point, net freight

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Second quarter sales exceeded the previous year's second quarter by \$2.6 million (17.6%). Net income declined by \$1.2 million (-38.5%) but this was offset by an increase in initial payments of almost \$1.0 million. This swing is the result of higher initial prices to fishers, which has the effect of transferring a greater percentage of profits to fishers earlier in the year.

The increase in whitefish deliveries is exciting to see after last year's all-time low volume. Of concern is the fact that this increase is concentrated in Manitoba, with all other regions delivering lower volumes than last year.

The now-global economic downturn will create significant challenges for the second half of the fiscal year. By the end of Q2, we were starting to feel price pressure on higher-value products in key US markets and this trend is expected to deepen and spread to Europe.

Noteworthy Items from the Second Quarter:

- ◆ The Board held its First Quarter Review in August 2007.
- ◆ Chairperson J. Bear and President J. Wood, along with local Board members met with government officials from Alberta, Saskatchewan, Manitoba and the Northwest Territories during the quarter to present FFMC's new Strategic Plan and discuss fishery issues.
- ◆ Our agent from Finland visited in September to tour the plant and local fishery.
- ◆ President J. Wood attended the Fisheries Council of Canada AGM in Quebec in October.
- ◆ FFMC rolled out a redesigned Performance Development System for all salaried staff as part of its new Strategic Plan.

HIGHLIGHTS BY PROVINCE

SECOND QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Initial payments to Manitoba fishers in the second quarter were up 10% from last year's level, due to an overall 6% increase in deliveries and higher initial prices than last year.
- ▶ Pickerel and sauger deliveries were up 3% and 130% respectively for the quarter compared to last year's second quarter.
- ▶ Northern pike production was down 5% this quarter.
- ▶ Mullet deliveries declined by 2% compared to the same quarter last year, in spite of stronger initial prices.
- ▶ Whitefish deliveries rose by 27% over the same time period last year. In spite of late maturity of the roe this year, fishers still delivered 25 tonnes, one tonne more than last year.

	Second Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year
INITIAL PAYMENTS TO FISHERS*	\$ 9,928	\$ 9,018	\$ 20,155	\$ 19,921
ROUND EQUIVALENT KGS				
Pickerel	2,298	2,240	5,028	5,350
Sauger	62	27	151	64
Whitefish	1,107	875	1,686	1,271
Northern Pike	530	557	708	774
Mullet	446	457	620	678

TOTAL WEIGHT	4,581	4,310	8,470	8,442

* Delivery Point, net freight

SASKATCHEWAN

(numbers in thousands)

- ▶ Initial payments in Q2 showed an increase of 5% compared to last year, while total deliveries declined by 8%.
- ▶ Pickerel production increased by 16%, northern pike by 15%, and mullet by 21%.
- ▶ Whitefish deliveries declined by 13% and lake trout deliveries (included in "other") were down about 66% from the same quarter last year, due to a shift in deliveries from August to July.

	Second Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year
INITIAL PAYMENTS TO FISHERS*	\$ 688	\$ 658	\$ 1,230	\$ 919

Other	80	120	196	191
TOTAL WEIGHT	548	595	1,032	980

* Delivery Point, net freight

ALBERTA

(numbers in thousands)

- ▶ Initial payments for Q2 were up 10% compared to Q2 last year.
- ▶ A substantial amount of Lesser Slave Lake whitefish quota was shifted from the spring fishery to the fall fishery again this year, and whitefish production therefore increased 10%.
- ▶ Initial payments to Alberta fishers should have been higher on the strength of higher whitefish deliveries and improved initial prices. However, whitefish roe on Lesser Slave Lake matured late and roe harvest was reduced from 32 tonnes last year to only 21 tonnes this year.

	Second Quarter		Year-To-Date

NORTHWEST TERRITORIES

(numbers in thousands)

- ▶ Initial payments showed a 2% improvement over Q2, based on higher initial prices. Total deliveries declined by 6%.
- ▶ Whitefish, which made up 80% of NT production, was down 6%.
- ▶ Pickerel deliveries doubled from 4,000 to 8,000 kgs.
- ▶ Under "other", fishers delivered less lake trout and inconnu than last year.
- ▶ Participation in the fishery declined again compared to last year by about 20%, while there was about a 10% compensating increase in fishing effort among remaining fishers. Net result was lower total deliveries.

	Second Quarter		Year-To-Date

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Revenue exceeded budget in the first quarter of the new fiscal year. It was, however, below the previous year's Q1 sales due in part to this year's lack of whitefish inventory. Another contributing factor is the comparison between above-normal pickerel volume in Q1 of 2007/08 (resulting from an inventory reduction strategy) and this year's Q1 pickerel sales being at normal levels.

Net income continued the previous quarter's strength as prices remained stable at levels not seen for several years.

Initial payments were down primarily due to lower pickerel deliveries.

Noteworthy Items from the First Quarter:

- ◆ The Board held its 4th Quarter Review meeting on June 25-26, 2008, and its 2007/08 Year-End Review on July 30-31, 2008, at which time the Annual Report was approved for submission to Ottawa.
- ◆ Government officials from Fisheries and Oceans and the Treasury Board (Ottawa) visited FFMC for a strategic planning presentation and plant tour.
- ◆ President J. Wood met with Manitoba's Water Stewardship Minister to discuss the spring fishery on Lake Winnipeg.
- ◆ In keeping with the Corporation's succession strategy, Gerald Malone has moved to Vice-President, Special Projects, and Paul Cater has joined the organization as Vice-President, Sales and Marketing.
- ◆ The Corporation participated in the Saskatchewan Commercial Fishermen's annual general meeting, as well as several meetings with fisher associations, government officials, and various other stakeholders.

HIGHLIGHTS BY PROVINCE

FIRST QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Initial payments to Manitoba fishers in the first quarter were down by 6% from last year, reflecting a late start in the spring fishery.
- ▶ For the same reason, pickerel deliveries decreased by 12% compared to the first quarter last year.
- ▶ Sauger deliveries showed a very large increase but over a very small base.
- ▶ Deliveries of whitefish were up significantly for Q1, mainly due to Norway House fishery targeting whitefish during June.
- ▶ Mullet and pike declined compared to Q1 last year, by 22% and 18% respectively.
- ▶ In the "other" category, there was an increase in lake trout deliveries, which was compensated by a decline in carp deliveries.

	First Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- ▶ Initial payments were up 40% compared to last year's first quarter, based on stronger whitefish deliveries at higher prices from both Wollaston and Reindeer lakes.
- ▶ Lake trout deliveries from Wollaston and Reindeer lakes, shown on the "other" line, also increased 65%.
- ▶ Decline in production was the rule for other species, with pickerel down 6%, northern pike lower by 37%, and mullet off by 16% compared to the first quarter last year.

ALBERTA

(numbers in thousands)

- ▶ Initial payments to fishers in Alberta decreased by 11% compared to the first quarter last year, in spite of higher whitefish prices.
- ▶ There was a 36% decline in whitefish deliveries from Lesser Slave Lake compared to the first quarter last year, as a result of a deliberate decision to shift more of the lake quota to the fall season.

	First Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year

NORTHWEST TERRITORIES

(numbers in thousands)

- ▶ Initial payments to NT fishers were 7% lower than for the first quarter last year.
- ▶ Increased initial prices for whitefish did nothing to reverse the established trend and deliveries were down again by 13%.
- ▶ The pattern of year-over-year decline in participation and fishing effort continues to plague the Great Slave Lake fishery.

** NOTE: Reporting in Round Equivalent Kilograms to be consistent with Annual Report

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Fourth quarter sales declined significantly from last year as higher pickerel prices and a weakening economic situation in our US markets reduced demand. The short supply of other species continues and the need to postpone or cancel orders has further reduced fourth quarter volume.

On the positive side, the short supply this year has created opportunities to increase prices in the market and this in turn has allowed the Corporation to set higher buying prices for the coming year.

Noteworthy Items from the Fourth Quarter:

- ◆ The Board of Directors held its Third Quarter Review in February 2008 and approved its five-year Corporate Plan at the end of March 2008.
- ◆ President J. Wood presented FPMC's new Strategic Plan to the Minister and Deputy Minister of Fisheries and Oceans in Ottawa (March), to the Interjurisdictional Working Group in Ottawa (April), and to Manitoba's Water Stewardship Minister (April). Similar presentations will be made early in the 2008/09 fiscal year to government representatives in the Corporation's three other major regions.
- ◆ FPMC senior management attended and exhibited at the Boston (February) and the Brussels (April) Seafood Shows; in addition, meetings of the National Seafood Sector Council Board, Manitoba Food Processors Association Finance Committee, Small Craft Harbour Authorities, a conference in Brussels entitled "Sustainability Today and Tomorrow", and various fisher associations were attended.

HIGHLIGHTS BY PROVINCE

FOURTH QUARTER REPORT

MANITOBA

(numbers in thousands)

- Q4 deliveries and initial payments to Manitoba fishers were up compared to Q4 last year, by 4% and 14% respectively
- Pickeral deliveries decreased by 44% and whitefish by 13%
- Northern pike deliveries showed a substantial increase of 73% compared to Q4 last year, augmented by 12,000 kg of roe purchases
- Mullet deliveries increased due to a limited spring run fishery in April
- In the "other" category, carp and carp roe deliveries were reduced, but perch deliveries increased
- YTD (year-end), the Manitoba fishery shows a 6% drop in deliveries and a 3% decrease of initial payments compared to last year. Northern pike was the only species to show an overall increase in deliveries.

	Fourth Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- Saskatchewan fishers had a better 4th quarter than last year due in part to late break-up. Most winter fishers in Saskatchewan delivered steadily through the first three weeks of April.
- Initial payments were up by 34% compared to Q4 last year and overall deliveries increased by 12%
- Pickeral (up 53%), mullet (up 12%) and northern pike (up 20%) deliveries were increased. Whitefish deliveries however were 25% lower than last year.
- YTD the Saskatchewan fishery exhibited an overall reduction of deliveries of all species except mullet and pike. As a result, there was a decline in initial payments (9%).

	Fourth Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year

* Delivery Point, net freight

ALBERTA

(numbers in thousands)

- The Alberta fishery in Q4 was completely different from Q4 of 2006/07, which featured a heavy "salvage" fishery on Utikuma Lake due to very low dissolved oxygen levels
- Whitefish deliveries were down drastically (84%) compared to Q4 last year and initial payments were reduced by 83%
- On a YTD basis, whitefish deliveries from Alberta were 900,000 kgs less than last year. This was the dominating factor behind the 48% reduction in overall deliveries and 58% decline in initial payments.

** NOTE: Reporting in Round Equivalent Kilograms to be consistent with Annual Report

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Third quarter sales showed some weakening, coming in \$0.5 million below budget and \$0.2 million below last year. Year-to-date sales remain ahead of last year. The third quarter weakening can be attributed to a decline in pickerel sales, as higher prices affect demand, but another cause of declining sales is a shortage of other species, especially whitefish.

The Corporation considers the short supply of whitefish its most serious issue at present. Inventories are now depleted and it has been necessary to put customers on allocation. Measures to alleviate this problem are being considered and readied for the coming season.

Year-to-date income is well above last year as price increases, cost control measures and an effective currency hedging strategy have all contributed to an improved result.

Noteworthy Items from the Third Quarter:

- ◆ The Board held its Second Quarter Review in November 2007.
- ◆ President J. Wood presented to the Board of Manitoba Commercial Inland Fishers Federation in November.
- ◆ The Corporation participated in a meeting with the Manitoba Water Stewardship Minister, in addition to various other fisher association meetings.
- ◆ Vice-President of Marketing/Sales, G. Malone, traveled to Finland, Poland and Sweden in December to meet with customers.
- ◆ Senior management met with Province of Manitoba representatives regarding Lake Winnipeg quota administration and the formation of a Lake Winnipeg Resource Management Board.

HIGHLIGHTS BY PROVINCE

THIRD QUARTER REPORT

MANITOBA

(numbers in thousands)

- Fishers experienced extremes in conditions this quarter, starting with mild weather and a later-than-normal freeze-up in November, and concluding with severe winter storms in January, which did not help to maintain winter fish deliveries.
- Manitoba saw 111 (19%) fewer fishers participating in the winter fishery than last year; their average deliveries were down by 24%
- Overall deliveries were down 37% compared to the third quarter last year and initial payments were down by 40%
- The increased prices for pickerel in January had no perceptible effect on deliveries

SASKATCHEWAN

(numbers in thousands)

- Fishers experienced extremes in conditions this quarter, starting with mild weather and a later-than-normal freeze-up in November, and concluding with severe winter storms in January, which did not help to maintain winter fish deliveries.
- The fishery experienced a drop in participation in this quarter, with 14 (8%) fewer fishers than in the third quarter last year, and their average deliveries were down by 3%
- Pickarel (25%), northern pike (14%) and whitefish (9%) deliveries were all down compared to the third quarter last year. Mullet deliveries were slightly improved (up 7%)
- Overall, Saskatchewan deliveries were down by 11% and initial payments declined by 15%

ALBERTA

(numbers in thousands)

- The third quarter this year looked especially bad in Alberta as the normal January opening on Utikuma Lake did not occur due to last year's winter kill problem
- As a result, deliveries from Alberta were down by 67% compared to the third quarter last year and initial payments declined by 67%
- Only 12 fishers participated in the Alberta fishery during the quarter, down from 38 last year. However, their average deliveries were up by 12%.

** NOTE: Reporting in Round Equivalent Kilograms to be consistent with Annual Report

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

The strong market of last year's final quarter carried over into the first quarter of the new fiscal year, pushing sales revenue to \$14.8 million, 20% above the same period last year. Income was almost double that of Q1 last year. These results were achieved despite the continued rise of the Canadian dollar which, at the end of the period, sat at \$1.07 to the US dollar versus \$1.13 one year ago. Although these improved results are largely due to better pickerel volume and prices, the market and price initiatives undertaken for whitefish and northern pike have also had a positive effect on returns.

Whitefish and mullet prices continue to hold at stronger levels, but the Corporation is short of product to meet the demand for these species. The situation is especially acute for whitefish, forcing the Corporation to put long-time customers on allocation.

Pickereel deliveries at the start of the Lake Winnipeg spring fishery were so heavy that the Corporation's plant capacity was overwhelmed and a temporary four-day suspension of those deliveries had to be implemented.

Noteworthy Items from the First Quarter:

- ◆ The Board held its 2006/07 Year-End Review on July 25-26, 2007, at which time the Annual Report was approved for submission to Ottawa.
- ◆ Major renovations were completed during a three-week plant maintenance shutdown in May 2007.
- ◆ The Corporation participated in Lake Winnipeg Advisory Board meetings, Saskatchewan Commercial Fishermen's annual meeting, and several other meetings with fisher associations and various other stakeholders.

Gouvernement du Canada

HIGHLIGHTS BY PROVINCE

FIRST QUARTER REPORT

MANITOBA

(numbers in thousands)

- Initial payments to Manitoba fishers in the first quarter were up 9% from last year, following the now well-established trend to more intense pickerel fishing effort during June.
- Pickerel deliveries increased again, up 7% compared to the first quarter last year.
- Sauger deliveries were very low, dropping by 44% from last year's level. This continues another long-term trend with sauger becoming almost insignificant in the Lake Winnipeg fishery.
- Deliveries of whitefish and mullet declined significantly compared to the first quarter last year, by 5% and 26% respectively.
- Northern pike deliveries increased by 17% compared to the first quarter last year.

	First Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- Initial payments declined drastically by 37% compared to last year's first quarter.
- Declines in deliveries for pickerel (down 27%), whitefish (down 37%) and lake trout (on the "Other" line in the table, down 33%) compared to the first quarter last year accounted for the decreased returns to fishers.
- Deliveries of northern pike and mullet were up by 30% and 17% respectively, compared to the first quarter last year.

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

A combination of several factors provided the Corporation with a stronger-than-expected final quarter. Although final results for the year have yet to be audited, the strong close means they will be better than was forecast in the third quarter report. Revenues in the fourth quarter jumped by 19% over the previous year, driven largely by strong pickerel sales as a result of high delivery volumes and the opportunity to sell product into new markets. Whitefish contributed to the improvement with steady to stronger prices and unexpected volume generated by the need for a salvage fishery in Alberta.

The value of the Corporation's hedging program was evident as the Canadian dollar began its climb back over USD \$0.90.

Initial payments to fishers increased by 61% over last year's fourth quarter, to just over \$4.0 million. This result pushes full year initial payments to \$30.2 million, an increase of 10.6% over 05/06 and the first year-over-year increase since 02/03.

The Corporation's fiscal year ended April 30. The year-to-date figures shown are preliminary and subject to final adjustments. A full review of the year's results will be presented in the Annual Report.

Noteworthy items from the Fourth Quarter:

- ◆ The Board held its 2006/07 Third Quarter review on February 28-March 1, 2007, and met to approve its five-year Corporate Plan on April 4-5, 2007.
- ◆ The Corporation participated in the Brussels and Boston Seafood Shows, several meetings related to Board membership on the National Seafood Sector Council, the Seafood Value Chain Roundtable, a Food and Beverage State of the Industry Forum (GFTC), and several fisher association annual general meetings.

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Continued high pickerel volume has maintained sales revenue above the previous year by 7.4% for the quarter and 8.6% year-to-date. Higher than normal inventories of larger sizes held by both FFMC and Lake Erie are depressing prices in North American markets despite actions taken by FFMC to increase sales in Europe. Whitefish prices have continued to hold firm at higher levels than a year ago; however, species volume is down 18% due to declining landings. The lower volume of whitefish means FFMC has been unable to meet customer demand, especially in the newly-developed overseas markets.

Net Income YTD is at a break-even level. With pickerel prices declining and whitefish in tight supply, it is projected that results will continue to soften during the final quarter.

In January, the Corporation began an in-depth strategic review to focus resources on processing efficiency, new products and market development. The objective is to position the Corporation more effectively in today's increasingly competitive business environment.

Noteworthy Items from the Third Quarter:

- ◆ The Board held its 2006/07 Second Quarter review on November 8-9, 2006.
- ◆ Hon. Loyola Hearn, Minister of Fisheries and Oceans, with James Bezan, MP, visited the plant and met with Board members in November.
- ◆ Chairman J. Bear and President J. Wood presented at the Crown Corporate Governance 2007 conference in Ottawa late January 2007.
- ◆ Board member David McArthur has now officially retired from the Board.
- ◆ The Corporation participated in meetings with the Interjurisdictional Working Group (DFO), government departments in Ottawa, and fisher associations.

du Canada

HIGHLIGHTS BY PROVINCE

THIRD QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Initial payments increased over \$500,000 compared to the third quarter last year, primarily due to an increase in pickerel deliveries (up 22%)
- ▶ Poor freeze-up and difficult conditions in most Manitoba winter fisheries
- ▶ Northern pike production up significantly
- ▶ Perch and carp deliveries ("other") improved
- ▶ Sauger (-30%), whitefish (-12%) and mullet (-20%) all declined compared to last year

	Third Quarter		Year-To-Date

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

First Quarter sales were up 3.8% from previous year levels, while volume declined by 10%. This result can be attributed to a more valuable overall mix of product in the latest period and a more balanced whitefish inventory, resulting in lower volumes but significantly higher prices for whitefish this year. A combination of increased sales, slightly improved labour and overhead charges, and the continued effectiveness of the currency hedging strategy resulted in a net income improvement of \$122,000 over the first quarter in 2005/06.

A strong spring harvest of pickerel pushed up total initial payments by \$1.4 million. Deliveries of pickerel increased by 1.2 million pounds while, with the exception of northern pike, deliveries of all other species declined, resulting in a net increase of a more modest 0.5 million pounds.

Noteworthy items from the First Quarter:

- ◆ The Board held its 2005/06 Fourth Quarter review on June 29-30, 2006.
- ◆ The Board of Directors' Selection Committee finalized its national search for a new President and CEO, and subsequently submitted the name of the recommended candidate to the Minister of Fisheries and Oceans for approval.
- ◆ The Corporation participated in the Brussels Seafood Show, Saskatchewan Commercial Fishermen's annual meeting, and several other meetings with various stakeholders.

HIGHLIGHTS BY PROVINCE

FIRST QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Initial payments to Manitoba fishers in the first quarter were up 18% from last year.
- ▶ This was the result of increased pickerel deliveries, which were up 25% compared to the first quarter last year.
- ▶ Sauger deliveries were very low, dropping by 67% from last year's level.
- ▶ Deliveries of whitefish and mullet declined compared to the first quarter last year but overall, the total deliveries were up by 4%.
- ▶ Northern pike deliveries increased by 29% compared to last year's very poor deliveries, but they are still below what would be expected in a normal year.

	First Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- ▶ Returns to fishers declined by 12% compared to last year's first quarter.
- ▶ Whitefish deliveries increased 30% over last year, while lake trout (seen on the "other" line in the table) showed a significant decrease (25%) compared to the first quarter last year.
- ▶ Deliveries of pickerel, northern pike, and mullet were reduced significantly.
- ▶ The Wollaston Lake fishery was delayed due to forest fires in the region and no production was recorded for the first quarter.

ALBERTA

(numbers in thousands)

- ▶ Initial payments to Alberta fishers decreased by 20% compared to the first quarter last year.
- ▶ There was an 8% decline in whitefish deliveries, and pickerel and northern pike production fell by 45% and 32% respectively.
- ▶ The Lesser Slave Lake spring fishery lasted 7 weeks this year, as opposed to 4 weeks last year.
- ▶ The number of fishers delivering in the first quarter declined to 31, compared to 40 who delivered last year.

NORTHWEST TERRITORIES

(numbers in thousands)

- ▶ Initial payments to NT fishers were down 11% from the first quarter last year.
- ▶ Whitefish deliveries were down 7%. Generally, deliveries of all species were reduced from last year, reflecting declining fishing effort.
- ▶ More progress was observed in the size grading of whitefish, with an increase in mediums and some large and jumbo fish showing up in the catch.
- ▶ Pickerel deliveries, mostly from Kakisa Lake, were 19% lower than in the first quarter last year.

TOTAL WEIGHT	4,411	5,485	36,727	39,055

* Delivery Point, net freight

PERFORMANCE HIGHLIGHTS

Results from the fourth quarter show sales 5% below last year's levels. Several factors caused this, including the ever-eroding exchange rate, a difference in the mix of products sold between the two years, and heightened competitive price pressure from increased pickerel catches on the Great Lakes.

These same factors, more or less, accounted for the loss in the quarter being \$1.1 million versus \$0.5 million last year.

Fourth quarter initial payments to fishers were 17% lower than last year, but in this case the reason is directly related to a decrease in deliveries.

The Corporation's fiscal year ended April 30 and the annual audit has begun. The year-to-date figures shown are preliminary and subject to final adjustments. A full review of the year's results will be presented in the Annual Report.

Noteworthy items from the Fourth Quarter:

- ◆ The Board held its 2005/06 Third Quarter review on February 22-23, 2006, and met to approve its five-year Corporate Plan on April 4-5, 2006.
- ◆ The Board of Directors' Selection Committee worked closely with Caldwell Partners to complete a national search for a new President and Chief Executive Officer, to replace retiring President Robert Hand.
- ◆ The Corporation participated in the Brussels and Boston Seafood and regional foodservice shows.

HIGHLIGHTS BY PROVINCE

FOURTH QUARTER REPORT

MANITOBA

(numbers in thousands)

- Fourth quarter deliveries were about the same as last year, although initial payments were down by 5%.
- The species mix changed from last year with lower deliveries of pickerel, sauger, northern pike, whitefish and carp. Mullet deliveries were up by 60% compared with the 4th quarter last year.
- Perch deliveries were up by 20%, although the year-to-date deliveries were lower than last year. This was the result of a later start on the Lake Manitoba perch fishery, which shifted deliveries from the 3rd to the 4th quarter.

	Fourth Quarter		Year-To-Date

* Delivery Point, net freight

SASKATCHEWAN

(numbers in thousands)

- Saskatchewan fishers had a poor 4th quarter compared to last year. However, the 4th quarter last year was very good and this year marks a return to the levels of deliveries and initial payments seen in the 4th quarter of 2003/04.
- Compared to the 4th quarter last year, deliveries were down 32% and initial payments were down 35%.

	Fourth Quarter		Year-To-Date

TOTAL WEIGHT	6,463	5,137	32,315	33,571

* Delivery Point, net freight

PERFORMANCE HIGHLIGHTS

Sales in the third quarter were 2% higher than last year, and initial payments to fishers showed a 16% gain as a result of increased whitefish and mullet deliveries.

The Net Income being off by only \$0.1 million is actually encouraging, given that the negative impact from a lower spot exchange rate would have been \$0.5 million. In addition, there were \$0.3 million in one-time consulting and reorganization expenses for the quarter. This demonstrates the success of our hedging strategy, along with progress being made with cost reduction and enhanced market value.

We are still projecting that the year-end sales and Net Income will be slightly below last year's levels.

Noteworthy Items from the Third Quarter:

- ◆ The Board held its 2005/06 Second Quarter review on November 30 and December 1, 2005.
- ◆ President Bob Hand announced his intention to retire once a suitable replacement is recruited. The Board has hired Caldwell Partners to undertake a nationwide search for candidates with proven food industry executive experience.
- ◆ The Corporation participated in meetings with the newly-formed Manitoba Commercial Inland Fisheries Federation and with other fisher associations.

HIGHLIGHTS BY PROVINCE

THIRD QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Mild weather and a late freeze-up in Manitoba inhibited fishing in November and December
- ▶ Continued record mild weather in January allowed Manitoba fishers to finish the quarter with better results than last year
- ▶ Deliveries were up 39% and initial payments rose 20%
- ▶ Among the higher-valued species, pickerel deliveries were up for the quarter, while perch and sauger production declined
- ▶ Whitefish showed a 49% increase in deliveries
- ▶ Mullet deliveries rose substantially (159%) compared to the third quarter last year

	Third Quarter		Year-To-Date

TOTAL WEIGHT	11,535	12,127	11,535	12,127

* Delivery Point, net freight

PERFORMANCE HIGHLIGHTS

First Quarter sales were \$0.5 million below last year and the Net Income was off by \$0.2 million, due primarily to the continuing weakness of the US dollar. Both these declines would have been at least \$0.4 million greater if not for a hedging strategy, along with other initiatives, undertaken to mitigate the impact of a strengthening Canadian dollar. Sales by weight (pounds sold) were almost identical to last year, with gains in whitefish and pickerel being offset by declines in the other species.

Initial payments were up by \$0.8 million (10%), as fishers focused their efforts on harvesting pickerel. However, the 37% increase in pickerel deliveries is not expected to be maintained for the full year. Quota restrictions will likely result in lower pickerel catches in the fall and winter fisheries.

Noteworthy items from the First Quarter:

- ◆ The Board held its 2004/05 fiscal year-end review on July 27-28, 2005.
- ◆ The Annual Report for the 2004/05 fiscal year was approved by the Board and submitted to Ottawa for tabling in Parliament. Copies will be circulated in due course.
- ◆ The Corporation participated in the Seafood Value Chain Roundtable, Saskatchewan Commercial Fishermen's and Norway House Fishermen's Co-op annual meetings, and held several informational meetings with various elected officials.

Government of Canada
Gouvernement du Canada

HIGHLIGHTS BY PROVINCE

FIRST QUARTER REPORT

MANITOBA

(numbers in thousands)

- Initial payments were up 10% from last year's first quarter.
- This was the result of increased pickerel deliveries, which were up 39% compared to the first quarter last year.
- Almost all of the increase in pickerel appeared as small headless grade.
- Production of all other species declined compared to the first quarter of 2004/05 and overall, total deliveries were down by 6%.
- Extremely high water levels affected fish production, particularly on the Nelson River system where northern pike deliveries were severely impacted.

(numbers in thousands)

- Initial payments to NWT fishers were up 33% from the first quarter last year.
- Whitefish production was up 32% due to increased activity in Great Slave Lake Area 1 West.
- Some progress was observed in size grading of whitefish, with a small increase in mediums and even a few large and jumbo fish showing up in the catch.
- Pickarel production, mostly from Kakisa Lake, was higher than in the same period in 2004/05.

TOTAL WEIGHT	5,485	7,520	39,055	45,314

* Delivery Point, net freight

PERFORMANCE HIGHLIGHTS

Fourth quarter sales were 11% lower than the previous year. This is mostly a timing of sales issue, i.e. certain customers took delivery of pickerel and sauger in the third quarter this year versus the fourth quarter last year. The Net Income was a loss for the quarter, resulting from the lower sales volumes and also generally weaker margins caused by a continuing strong dollar. Initial payments to fishers were off by 19%, while deliveries were down 27%.

The preliminary numbers year-to-date are more positive than for the fourth quarter. Sales are 4% lower mainly as a result of reduced mullet sales. The \$1.8 million Net Income compares to a \$0.8 million loss in 2004. Initial payments are down 15% but when combined with the Net Income, the decrease lessens to 9% (Note: last year's loss came out of retained earnings and therefore was not factored into this calculation). This reflected lower initial prices and a decline in deliveries.

The Corporation's fiscal year ended April 30 and the annual audit has begun. The Annual Report for 2004/05 should be published by mid-August.

Noteworthy items from the Fourth Quarter:

- ◆ The Board held its 2004/05 Third Quarter review on March 8-9, 2005, and met to approve its five-year Corporate Plan on March 31-April 1, 2005.
- ◆ The Corporation participated in the Brussels and Boston Seafood and regional foodservice shows.
- ◆ Efforts selling into non-traditional markets resulted in customers from three countries purchasing whitefish for the first time.

Government
of CanadaGouvernement
du Canada

HIGHLIGHTS BY PROVINCE

FOURTH QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Fourth quarter deliveries were down 48% from last year.
- ▶ Deliveries of all species were down. A combination of poor ice conditions, high fuel costs and lower initial prices affected fishing effort.
- ▶ A poor perch fishery in February and delivery restrictions on mullet further reduced returns to fishers during this quarter.
- ▶ Initial payments were down \$660,000 or 29%, compared to the fourth quarter last year.

	Fourth Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year
INITIAL PAYMENTS TO FISHERS*	\$ 1,579	\$ 2,239	\$ 22,492	\$ 25,764

TOTAL WEIGHT	2,487	4,757	26,517	30,943

* Delivery Point, net freight

SASKATCHEWAN

(numbers in thousands)

- ▶ Saskatchewan fishers enjoyed a much better fourth quarter than last year, with both deliveries and initial payments doubled.
- ▶ Pickerel, whitefish, northern pike and mullet deliveries were all significantly higher compared to the fourth quarter last year.

	Fourth Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year
INITIAL PAYMENTS TO FISHERS*	\$ 600	\$ 284	\$ 3,086	\$ 3,884

NORTHWEST TERRITORIES

(numbers in thousands)

- ▶ Initial payments to NT fishers in this quarter declined 59% compared to last year.
- ▶ Reduced participation in the winter fishery resulted in a 37% drop in export whitefish deliveries for the fourth quarter.
- ▶ The drop in initial payments was proportionately greater than the drop in deliveries because the fishery continued to produce a lot of small size grade whitefish.

	Fourth Quarter		Year-To-Date

TOTAL WEIGHT	5,137	9,923	33,571	37,793

* Delivery Point, net freight

PERFORMANCE HIGHLIGHTS

Unusual winter weather conditions, particularly in Manitoba and Saskatchewan, resulted in significantly reduced fish catches in the third quarter. Deliveries, along with initial payments to fishers, were almost 50% below the previous year.

Third quarter sales, on the other hand, were only slightly below last year's levels. The net income for the quarter was a \$0.8 million loss, which compared to a \$1.5 million loss last year. Year-to-date sales are also very much the same as last year, while the net income has shown a \$3.0 million year-over-year improvement.

Noteworthy items from the Third Quarter:

- ◆ The Board held its 2004/05 Second Quarter review on November 24-25, 2004.
- ◆ A dozen top restaurant operators from the American mid-west participated in a Whitefish promotion event in Gimli, Manitoba.
- ◆ Lower-priced competition and uneven supply, combined with a continued weakness in the US dollar, resulted in the loss of a significant market for mullet. Consequently, fishers were placed on restricted deliveries for the species until replacement markets can be found.
- ◆ The Corporation also introduced an adjustment program for Northern Pike, based on a two-tier initial pricing system, in order to balance inventories.

Government
of Canada

Gouvernement
du Canada

HIGHLIGHTS BY PROVINCE

THIRD QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Fishery began with unexpectedly mild November, which delayed freeze-up
- ▶ Winter fishing conditions were generally poor
- ▶ Deliveries for all species down compared to third quarter last year
- ▶ Winter mullet purchase restrictions reduced deliveries to less than one-third of last year's
- ▶ Lake Manitoba perch fishery was quite poor
- ▶ Initial payments were reduced by nearly \$1.8 million compared to third quarter last year

	Third Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year

* Delivery Point, net freight

SASKATCHEWAN

(numbers in thousands)

- ▶ Winter fishing delayed by a mild November
- ▶ As a result, production dropped considerably from last year – especially whitefish, down 49% from third quarter levels in 2003-04
- ▶ Winter fisheries also suffered from restrictions on mullet purchases
- ▶ Initial payments were down 41% from the previous year

	Third Quarter		Year-To-Date

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Demand for walleye/pickrel continues to be strong despite higher prices. Customers remain on allocation and volumes are restricted due to low inventories. Whitefish achieved its aggressive sales plan; however, margins remain under pressure due to the cost of new market development and the timing of caviar sales, which will catch up with plan in the fourth quarter. Lake trout lox was launched as a new product into the western Canadian retail market.

Deliveries in the quarter were down substantially from previous year's levels due to a late freeze-up and export dealer licensee activities in Manitoba. Some, but not all, of this shortfall will be made up in the fourth quarter.

Depreciation and loan levels remain below plan due to the postponement of certain capital expenditures until late in the year.

Noteworthy Items from the Third Quarter:

- Minister of Fisheries and Oceans, Gail Shea, visited the Corporation to meet with senior management and to tour the plant on December 13.
- The Board held its Q2 review meetings November 23-25, 2010. Representatives from the Office of the Auditor General presented the results of a Special Examination.
- Newly-appointed Chairperson David Tomasson chaired his first meeting of the Board of Directors.
- Vice-President of Sales and Marketing, Paul Cater, attended the Seafood Value Roundtable in Ottawa in early December.
- Manitoba fisher meetings were conducted in Grand Rapids, Riverton, Hollow Water and Gimli throughout the quarter.

10/11

Highlights by Province

MANITOBA (numbers in thousands)

- Overall deliveries decreased by 19%
- Walleye decreased by 44% over Q3 last year with decreased deliveries from Lakes Winnipeg and Manitoba (both lakes only produced about half of last year's levels)
- Mullet decreased by 60% with deliveries down from Lakes Winnipegosis and Manitoba
- Whitefish increased 8% over Q3 last year with increased deliveries from Lake St. Martin
- Initial payments to fishers decreased by 38% due to lower initial prices, lower winter premiums, decreased deliveries and less fisher participation

	Third Quarter		Year-To-Date

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30

PERFORMANCE HIGHLIGHTS

Q2 sales were 24% ahead of the same period last year, bringing YTD sales to \$33.5 million, 11% ahead of the previous year. The improved sales situation is entirely due to strong walleye sales into the USA. Other species and markets are generally on plan but not significantly ahead of previous year levels.

Period expenses for sales and administration are below plan due to the timing of certain expenses. By year-end, period expenses are expected to be on plan.

Earnings of \$2.5 million are ahead of the planned \$1.6 million due to better than expected prices but due to the Canadian dollar being at par with the USD, well below previous year levels of \$4.4 million.

Walleye inventories, especially in the most popular size grades, are extremely low which will negatively impact second half earnings for the year. Lake whitefish inventories, formerly somewhat high, are getting closer to a balanced situation as sales to Russia, Poland and Finland pick up and the competitive pricing situation in the New York market improves.

Noteworthy Items from the Second Quarter:

- The Board held its Q1 Review on August 25-26, 2010; the Audit Committee met on August 24.
- Minister Shea announced the appointment of new Chairperson David Tomasson to the FPMC Board of Directors, effective September 30, 2010.
- Representatives from the Office of the Auditor General of Canada met with management in October to discuss the Special Examination it is conducting.
- President J. Wood attended the Fisheries Council of Canada AGM October 26-28 in Ottawa.
- FPMC's Strategic Planning Workshop for 2011 was held October 19-20 and included both the Board and senior management.
- Health & Safety Committee meetings were held August 11, September 8, and October 13.

10/11

Highlights by Province

MANITOBA (numbers in thousands)

- Overall deliveries decreased by 3%
- Walleye increased by 7% over Q2 last year with increased deliveries from Cedar Lake, Playgreen Lake, Granville Lake and Lake Winnipegosis
- Mullet decreased by 41% with lower deliveries from Lake Winnipegosis and Cedar Lake
- Lake whitefish decreased 5% over Q2 last year with decreased deliveries from Playgreen, South Indian and William Lakes
- Initial payments to fishers decreased by 7% due to lower initial pricing and decreased deliveries

PERFORMANCE HIGHLIGHTS

First quarter net sales were essentially equal to the previous year and slightly ahead of the budget figure of \$14.2 million. Lake whitefish continued to suffer from the oversupply that hurt markets in the final quarter of the previous year, but this weakness was offset by excellent walleye results.

Earnings of \$1.0 million for the quarter were slightly ahead of budget but well below the previous year's \$3.6 million. It should be noted that 2009/10 first quarter results included an extraordinary foreign exchange gain of \$2.2 million. Once this gain is removed, year-to-year results are very similar.

Deliveries of walleye were ahead of the previous year by more than 500,000 kilograms due primarily to the early start to the season versus last year's very late start.

Lake whitefish profitability will remain below expectations until the now six-month long oversupply situation is resolved. With the strong Canadian dollar hindering profitability in all species, corporate earnings will be dependent on the results achieved by walleye in the 2010/11 fiscal year. This will be a precarious situation if the inventory of walleye size grades available does not meet customer requirements.

Noteworthy Items from the First Quarter:

- President J Wood and S Lazar, CFO, met with the Minister's office in Ottawa regarding Freshwater's Corporate Plan.
- The Audit Committee and Board of Directors met for their year-end review meeting and approval of the 2009/10 Annual Report on July 6-8, 2010.
- J Wood and D Northcott, VP Operations, attended fishers' meetings in Saskatchewan, Manitoba and Hay River, NWT in each month of the first quarter.
- P Cater, VP Sales & Marketing, attended the Seafood Value Roundtable in Ottawa.
- Health & Safety committee meetings were held in May and June.

10/11

Highlights by Province

MANITOBA (numbers in thousands)

- Overall deliveries decreased by 5%.
- Pickerel/walleye increased by 24% over Q1 last year with increased deliveries from both Lake Winnipeg and Cedar Lake
- Mullet decreased by 55% with decreased deliveries from Lake Winnipegosis and Lake Winnipeg
- Lake whitefish decreased 13% over Q1 last year with decreased deliveries from Lake Winnipeg, Lake Winnipegosis, Cedar Lake and Northern Manitoba lakes
- Initial payments to fishers decreased by 10% due to lower initial pricing and decreased deliveries

PERFORMANCE HIGHLIGHTS

YTD payments to fishers are down from PY primarily due to lower initial prices this year. The late season also impacted deliveries and by the close of the open water fishery, significant Lake Winnipeg pickerel/walleye quota remains to be used.

Net Sales for the quarter are below PY levels due in part to changes in the timing of major marketing initiatives for large size walleye filets. This year, the program and its major impact on sales volume occurred in Q1, where last year it ran in Q2. YTD net sales exceeded PY by \$1.5 million (5%) with three of four major species exceeding PY numbers. While whitefish sales are down YTD, plans have been put into action to drive incremental sales in the latter half of the year to recover this shortfall.

Earnings performance is very strong with Net Income well ahead of both PY and Budget. Caution is necessary, however, as approximately 50% of YTD Earnings is due to gains from the Corporation's foreign exchange hedging. This risk-reduction strategy will not generate such strong results in the second half of the year.

Noteworthy Items from the Second Quarter:

- The Board held its 1st Quarter Review on September 2-3, 2009, and the first meeting of FFMC's Audit Committee was conducted on September 1.
- Representatives from Treasury Board and the Department of Finance (Ottawa) met with senior management and toured the plant in August.
- Five senators from the Standing Senate Committee on Fisheries and Oceans visited for a successful presentation, meeting and plant tour on September 18.
- President J. Wood attended the Fisheries Council of Canada conference from October 27-29 in PEI, and has been appointed Vice-Chairperson for the coming year.
- FFMC's Strategic Planning Workshop for 2010 was held on October 20-21.
- Regional Workshops for fishers were held in Saskatchewan.
- Health & Safety Committee meetings were held August 14, September 9, and October 14.

09/10

Highlights by Province

MANITOBA (numbers in thousands)

- Initial payments to Manitoba fishers in the second quarter were down by 23% from Q2 last year due to lower initial prices and reduced deliveries.
- Deliveries were down by 13%, mainly due to a late start on Lake Winnipeg.
- Walleye deliveries decreased by 14% compared to Q2 last year due to late start of the season.
- Whitefish deliveries decreased by 18% compared to Q2 last year.
- Pike deliveries decreased by 10% due to slightly lower deliveries from Cedar and Playgreen Lakes.
- Mullet deliveries were up by 8% compared to the same quarter a year ago.

PERFORMANCE HIGHLIGHTS

YTD sales revenue and net income have remained strong and are tracking ahead of last year's performance at the end of Q3. Although below current fiscal YTD budgets and influenced by a strong Canadian dollar in key markets, sales volumes are consistent with last year's levels and strong market prices have contributed to the financial performance reflected in YTD results. The Corporation's foreign exchange hedging policy has also contributed to Q3 YTD financial results. The continuing strength of the Canadian dollar forecast in Q4 and pressure on operating expenses will impact the final earnings of the Corporation. Existing profitability levels are not forecast to continue through the remainder of the fiscal year.

The strengthening of the Canadian dollar against both the USD and the Euro negatively impacted sales performance. There are shortages of walleye in key sizes entering into the Lent period (Q4). New business initiatives have been launched: smoked lake trout into select Canadian retail markets and fresh walleye into Germany via a new customer.

Initial payments to fishers were down by 5% due to deliveries decreasing by 6% in the quarter. Total deliveries were lower as a result of a late start to the winter fishery caused by mild weather early in the season. Walleye and whitefish production was actually higher by 7% and 32% respectively in Q3 as fishers increased fishing intensity to catch remaining quotas. Northern Pike and mullet deliveries decreased by 37% and 19% respectively.

Noteworthy Items from the Third Quarter:

- Deputy Minister of Fisheries and Oceans, Claire Dansereau met with the provincial deputy ministers and FFMC senior management at the Corporation on November 23.
- The Board held its two-day Q2 review meeting immediately following the Audit Committee meeting held on November 17.
- A team from the Office of the Auditor General was on-site in December 2009 and January 2010 to gather information for its Special Examination.
- FFMC's second Strategic Planning Workshop for 2010/11 was held on December 10.
- President J. Wood attended a Crown Corporation governance course in Ottawa in early December.
- A Federal/Provincial meeting was held at FFMC on January 19.
- Five successful Regional Workshops for fishers were held in various northern Manitoba locations.
- Health & Safety Committee meetings were held November 26, December 9, and January 22.

PERFORMANCE HIGHLIGHTS

The first quarter has given the 2009/10 fiscal year a strong start. Overall Sales revenues were up \$2.8 million, or 21.7% vs. the prior year. For the quarter, sales of pickerel/walleye were up due to a marketing promotion to mitigate excess large fillet inventory. Northern pike volumes were up as marketing programs undertaken in the spring at key customers drove incremental loads into France. Whitefish sales were below expectations as whole fresh fish sales were negatively impacted by a reduction in the amount of fresh available for sale, coupled with aggressive competitive price reductions in the New York market.

Net Earnings were significantly affected by the required mark-to-market accounting treatment of our currency hedging operations. Mark-to-market at the end of the quarter created an extraordinary gain to earnings of approximately \$2.2 million. The reader should factor this in when comparing the latest earnings of \$3.7 million against last year's \$0.7 million. Management expects ongoing movement in currencies to bring extraordinary gains to zero over the balance of the year.

Although pickerel/walleye deliveries are down against last year, when the sauger volume is taken into account total deliveries are about level with last year. Of more concern is the decline in whitefish deliveries after a strong year in 2008/09. Management is taking corrective action to bring deliveries back to budgeted volumes.

Noteworthy Items from the First Quarter:

- The Board held its 4th Quarter Review meeting on June 24-25, 2009, and its 2008/09 Year-End Review on July 29-30, 2009, at which time the 2008/09 Annual Report was approved for submission to Ottawa.
- Plant and Quality Assurance Managers traveled to China and toured several plants there in May.
- The sixth annual FPMC Productivity Workshop was held May 12.
- Gerald Malone, VP of Special Projects, and Stephen Kendall, VP of Operations, retired from FPMC; former Plant Manager David Northcott was promoted to VP of Operations.
- The plant was shut down for three weeks in May for annual maintenance projects.
- Health & Safety committee meetings were held in June and July.

Highlights by Province

MANITOBA (numbers in thousands)

- Initial payments to Manitoba fishers in the first quarter were down by 11% from Q1 last year, reflecting lower initial prices this year.
- Pickereel/walleye deliveries were down 15% compared to Q1 last year.
- Sauger deliveries, however, were up 420% but over a much smaller base.
- Mullet and pike deliveries were up 84% and 51% respectively compared to Q1 last year.
- Whitefish deliveries were down 6% in the quarter.

	First Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year
INITIAL PAYMENTS TO FISHERS*	\$ 9,055	\$10,227	\$ 9,055	\$10,227

SASKATCHEWAN (numbers in thousands)

- Initial payments were down 18% due to lower initial prices, as deliveries were essentially on a par with the first quarter of last year.
- Whitefish deliveries were down 1% from Q1 last year.
- Northern Pike deliveries were up 88% over Q1 last year but this was also on a small base.
- The "other" category was down 11% from last year. This category consists of lake trout.

ALBERTA (numbers in thousands)

- Initial payments to fishers in Alberta decreased by 72% compared to the first quarter last year, due to lower initial prices and a sharp decline in deliveries.
- There was a 60% decline in whitefish deliveries from Lesser Slave Lake compared to Q1 last year, as a result of a deliberate decision to shift more of the lake quota to the fall season.

	First Quarter		Year-To-Date	
	This Year	Last Year	This Year	Last Year

NORTHWEST TERRITORIES (numbers in thousands)

- Initial payments to NT fishers were 30% lower than for the first quarter last year, due to lower initial prices and deliveries being 11% lower.
- Whitefish deliveries were 23% lower in the quarter despite increased efforts to encourage extra participants into this fishery.
- The pattern of year-over-year declines in participation and fishing effort continues to plague the Great Slave Lake fishery.

	First Quarter		Year-To-Date

* Delivery Point, net freight

** All figures are preliminary until audited at the Corporation's fiscal year-end of April 30, 2009

PERFORMANCE HIGHLIGHTS

Initial payments to fishers were up dramatically (64%) over the fourth quarter of the previous year. This increase was driven by premiums for winter deliveries offered by FPMC and the return of fishers to the fishery as alternative jobs fell victim to the faltering economy.

In the face of the difficult economic situation, sales still increased by 29.5% over the previous year. Much of this increase was in fresh sales made possible by the increased deliveries. Frozen sales also improved, driven by aggressive promotion activity in key markets. One major customer increased its Lent volume by 50% over forecast. Inventories were significantly higher by quarter-end due to the stronger deliveries but are approximately equal to the nine-year average in volume terms.

Noteworthy Items from the Fourth Quarter:

- ♦ The Board of Directors held its Third Quarter Review in February 2009 and approved its five-year Corporate Plan in early April 2009.
- ♦ FPMC senior management attended and exhibited at the Boston (March) and the Brussels (April) Seafood Shows, The National Seafood Sector Council Board / Annual General meetings (British Columbia), and the Fisheries Council of Canada conference in Ottawa, as well as various other fisher association meetings in most regions.
- ♦ FPMC conducted a successful two-day Workshop for fishers at the end of March.
- ♦ Board member Ed Isfeld (Manitoba) retired after 19 years of dedicated service. He will be replaced by Ken Campbell of Gimli, Manitoba.
- ♦ The FPMC plant was shut down for three weeks beginning April 27 for annual scheduled maintenance.

HIGHLIGHTS BY PROVINCE

FOURTH QUARTER REPORT

MANITOBA

(numbers in thousands)

- ▶ Q4 deliveries and initial payments to Manitoba fishers were up substantially compared to Q4 last year, by 27% and 54% respectively.
- ▶ Pickerel, sauger, whitefish and northern pike deliveries all increased compared to Q4 last year. Higher initial prices were also in effect, explaining the disproportionate increase in initial payments.
- ▶ Mullet deliveries in Q4 were down 25% compared to last year.
- ▶ Notable in the "other" category were decreased perch deliveries and an increase in carp.
- ▶ YTD (year-end) the Manitoba fishery shows a 10% increase in deliveries and a 13% increase in initial payments compared to last year.

	Fourth Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- ▶ Q4 initial payments to Saskatchewan fishers were almost double last year's, thanks to a 59% increase in overall deliveries and higher initial prices.
- ▶ Pickerel deliveries were down a little (-12%), while mullet (up 29%), whitefish (up 195%), and northern pike (up 64%) all showed substantial increases compared to the 4th quarter last year.
- ▶ YTD (year-end), the Saskatchewan fishery showed an overall rise in deliveries of all species (up 32% in total) and an overall increase in initial payments (66%).

	Fourth Quarter		Year-To-Date

ALBERTA

(numbers in thousands)

- ▶ The Alberta fishery in Q4 improved over last year due to a partial recovery of the Utikuma lake fishery and more activity in southern Alberta.
- ▶ Whitefish deliveries were up (103%) compared to Q4 last year and initial payments were increased by 155%.
- ▶ On a YTD basis, whitefish deliveries from Alberta were up 23% from the previous year. Increased deliveries and higher initial prices pushed initial payments to a 65% improvement over last year.

PERFORMANCE HIGHLIGHTS

Overall foodservice industry volumes in FFMC's key US markets were off by approximately 11% over the past three months. Canadian foodservice industry volumes are down 4-5% over the same period. As well, most European economies are now officially in a recession.

Against this difficult situation, margins are holding up well. Although YTD Net Earnings are down against Previous Year (\$1.8 million against \$2.7 million), the Corporation has been able to maintain higher buying prices, resulting in an increase in Total Returns to Fishers of \$31.0 million, against \$28.8 the Previous Year. For the second year, the Corporation posted premiums for fish delivered during the winter season. These premiums, along with excellent fishing conditions, resulted in a significant increase in winter deliveries.

Quarter 4 Forecast: FFMC will need to work hard to manage and maintain stability of pricing in all markets. Economic uncertainty will be a significant challenge with downward pricing pressures occurring in our key whitefish (Europe) and pickerel/walleye (US) markets.

Noteworthy Items from the Third Quarter:

- ◆ The Board held its Second Quarter Review in early December 2008.
- ◆ Assistant Deputy Minister (DFO) David Bevan and three federal government officials visited FFMC for a plant tour and presentation in December.
- ◆ Vice-President G. Malone attended the Seafood Round Table in Ottawa in December.
- ◆ Staff from the Office of the Auditor General conducted meetings with FFMC senior staff in January, in preparation for their Special Examination (conducted every 3 years).
- ◆ President J. Wood attended a meeting on Corporate Governance hosted by the Treasury Board in Ottawa, in November 2008.
- ◆ A two-day Strategic Review Planning workshop was conducted at the end of January with senior staff.
- ◆ Health & Safety Committee met November 20, December 10, and January 14.
- ◆ Various fisher association meetings were attended in Gimli, Selkirk and Matheson Island this quarter.

HIGHLIGHTS BY PROVINCE

THIRD QUARTER REPORT

MANITOBA

(numbers in thousands)

- Q3 initial payments were double last year's based on overall deliveries being 61% higher and higher initial prices this year
- Winter fishing conditions were good with an early freeze-up in November; average delivery per fisher increased
- 93 more fishers delivering Manitoba fish this quarter compared to last year
- Pickrel deliveries up by 81% over Q3 last year (mainly Lake Manitoba)
- Sauger, whitefish, northern pike and mullet all increased substantially compared to Q3 one year ago

	Third Quarter		Year-To-Date

SASKATCHEWAN

(numbers in thousands)

- Initial payments in Q3 increased 88% compared to one year ago, in spite of a later winter fishing start
- Fishers also increased deliveries by 48%
- The number of fishers delivering rose to 229 from 150 last year
- Average deliveries stayed about the same
- Pickrel, northern pike and mullet deliveries were all up about 30%
- Whitefish deliveries showed a marked 81% increase over Q3 last year
